GUN SAILS

INTRO

GUN SAILS FOR WIND SURFERS

Distributing windsurf products via direct sales system at an unbeatable cost effectiveness – this idea was born 20 years ago, established itself and has now became a matter of course in the era of online shopping.
20 years Gun Sails – on the occasion of this anniversary we would like to give our sincere thanks to all our faithful customers.
Also for this season, Gun Sails have risen to the highest demands in quality.

The new sail line is a result of continuation and optimisation of the new look created in 2006, with new premium materials and the new sophisticated features and details. Solid x-ply in white and grey set a president in the design, new sail features such as the new triple pulley, new mast sleeve material or the thermo foam mast protector make rigging very easy and comfortable.
The new sail in our line up "Nexus" is a performance-oriented crossover sail in a 100% x-ply construction for absolute longevity.
As usual you can find in our range everything you need for a perfect windsurfing day: a mast concept line that offers masts for every style, functional and comfortable harnesses, high-quality neoprene suits and a wide range of windsurf and travel bags.
It's always worth a visit to our 24 hours online store where you can find out the latest news and special offers.
Have fun and see you out there on the water!

Your Gun Sails Team

SERVICE

ORDERING – QUICK AND EASY

Tel. (+49) 6893 80 110
Our hotline with professional advice is available from Monday to Friday, 09.00 to 18.00, otherwise just leave a message on our answering machine.
Fax (+49) 6893 70628
Or very fast and simple, 24 hours a day, 7 days a week:
www.gunsails.de **service@gunsails.de**

For UK + Ireland: Personal advice available from 07.30 to 16.00, Monday to Saturday.
Hotline: 0870 8000 999
Visit the website **www.gunsails.co.uk**
or mail to: **info@gunsails.co.uk**
UK + Ireland fax orders 0208 395 8595

DELIVERY

When ordered at our headquarter in Germany, your articles will be delivered by UPS. For freight charges, please check our website or contact us: service@gunsails.de

UK + Ireland customers mail to:
info@gunsails.co.uk

Or just contact your local dealer.

EASY PAYMENT

You can pay for your gear

- with VISA or Mastercard

- via Cash on Delivery in European countries.

For further details, please contact our central office or your local dealer.

NO RISK

All shipments are covered by insurance and are delivered via UPS or other reliable forwarders.

SAIL REPAIR SERVICE

We offer a professional sail repair.
For further information, please contact our hotline.

TOP QUALITY

All Gun Sails articles are subject to a strict quality control and are permanently checked. Sails and masts carry a 24 month warranty, all other accessories 12 month.

CALL AND ORDER

WWW.GUNSAILS.DE

WE ARE OPEN 24/24 - 7 DAYS A WEEK

20 Years of Gun Sails, for all that time we have developed, produced and distributed our brand for windsurfers worldwide.
We have been the pioneers in selling windsurf products through the mail order system.
Being smiled at and criticised at first by some of the other surf providers then, our pricing politics and our high quality standards prevailed.
Our established high customer satisfaction is achieved by our team of competent and ambitious employees.
We absolutely know that the wind doesn't wait, therefore we try to deliver the required articles to you as soon as we can.
A warehouse capacity of nearly 3000 sqm with about 400 delivered packages a day assure a friction-less direct delivery system.

The Gun Sails Homepage has now existed for more than 10 years, and the number of our online customers is increasing every year.
Average of 2,000 sailors per day visit our website to order their windsurf gear, to get information on our products, to find out the latest news or to subscribe to our Newsletter "Gun Sails Today".
We also offer a top modern shop system, which makes online shopping very easy and secure. Thus you can choose your gear from the comfort of your own home, whenever you want. The Gun Sails web-site offers you more information, more action pictures, news and information on test events, an easy and comfortable shopping with order and shipping confirmation by email – and all this quickly, secure and clearly laid out – Test it!

TEST REPORTS

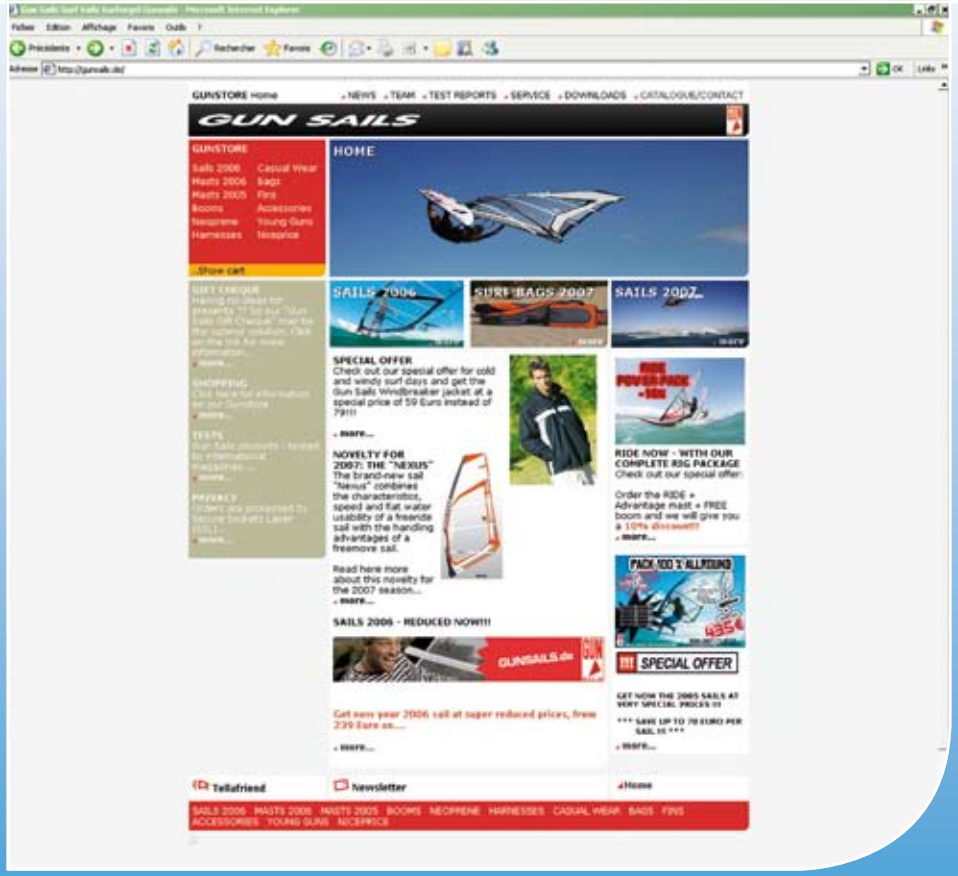
Click here to read test reports about our products, carried out by the international specialised press.

GUN SAILS NEWS

In our news section, you can have a clear look at our constantly updated news of the Gun Sails world, such as new products, success of our team riders, special sales promotion, etc.

DOWNLOAD CENTER

Check out our download center for a free down-load of wallpapers, user manual and trim guide, product care information or action shots of our team riders.



SERVICE

In this section, you can find all worth knowing about Gun Sails, every information about our online shop, information about our sail repair service, our international dealer contacts and much more.

GUN STORE

Go on a relaxed shopping trip, whenever you want. In our Gunstore you can place your order at any time you want. All of our products are shown with many details and pictures. The order form with all your private details is certainly securely encrypted via the SSL (Secure Socket Layer) system. After placing the order, an order confirmation will be sent to you immediately and as soon as your order is shipped, you will receive a further email quoting the tracking number, so you could also trace your parcel via Internet.

NICE PRICE

The special section of up to date offers and bargains.
No matter if you are looking for phase-out models, used gear at special prices, or ex-demo and exhibition sails and accessories, just visit our nice price section in order to have a look at all current special offers.
This section is updated every day, so check it out.

GUN SAILS TODAY - OUR NEWSLETTER

As a subscriber of our newsletter “Gun Sails Today”, you will be the first to learn about all the need-to-know, such as new products, special sales promotion exclusively for subscribers, insider-news and many more.
Particular features like special offers, downloads, tips around the gear or prize draws will exclusively appear in Gun Sails Today.

So it’s worth subscribing to it, of course free of charge, and sure you could unsubscribe from it at any time.

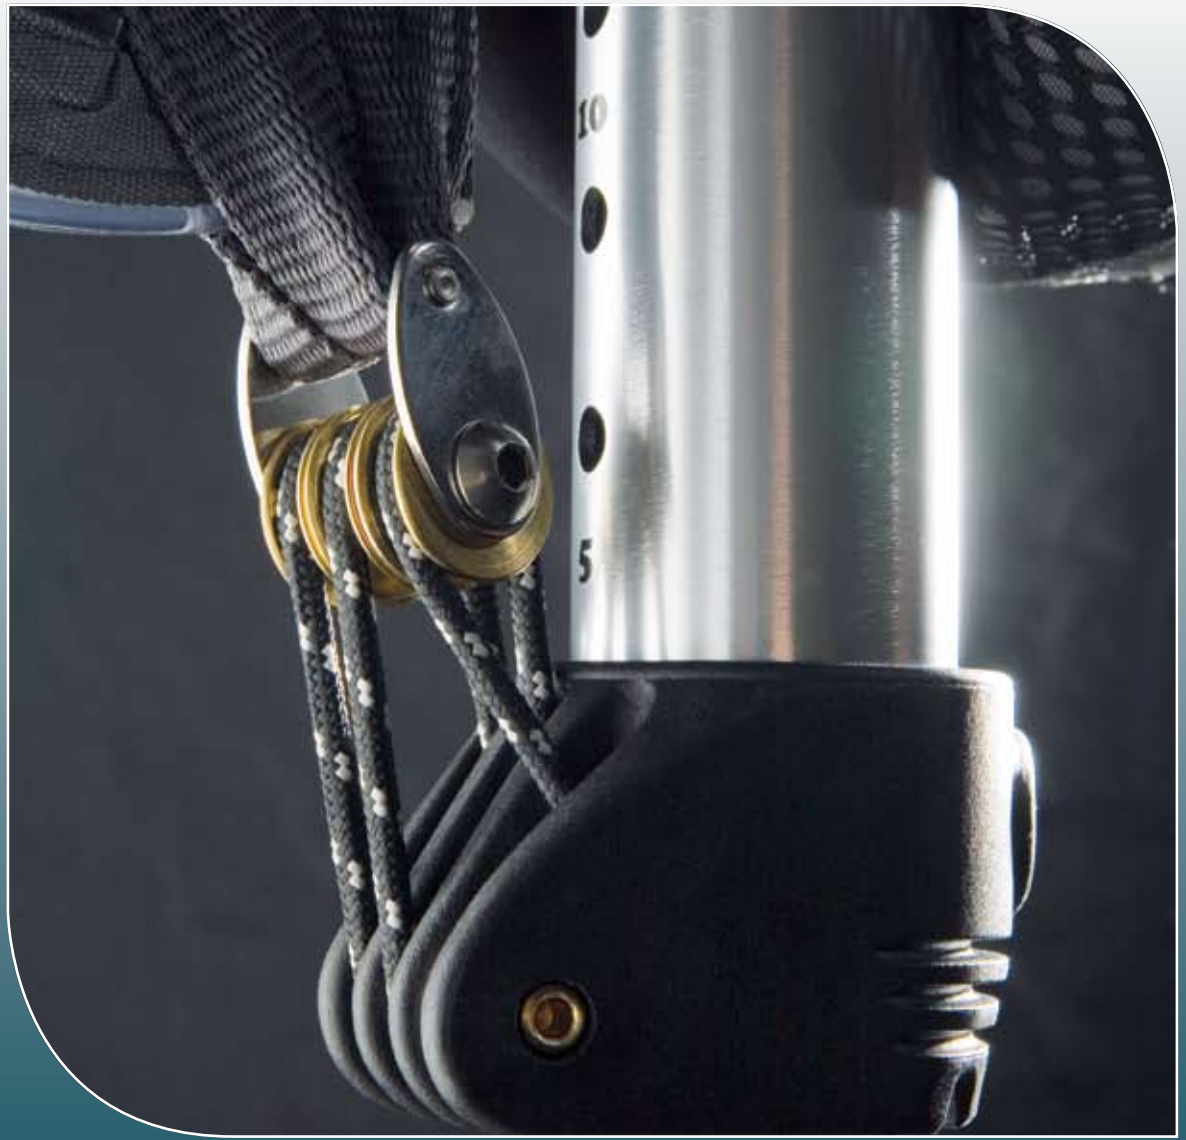
DESIGN AND STYLE

SAIL DESIGN BY EXPERIENCE

Gun Sails sail designer Renato Morlotti ranks among the most experienced sail makers of the world. 25 years ago, he began his career in an Italian sail-making factory and learned this trade thoroughly. Renato gradually evolved his own styling details, developing unique and successful sail cuts, testing the products on the water as well as managing the production of the resulting sail ranges.

Recentley, Renato has been designing the sails at the computer with special 3D software. This enables him to simulate different sail characteristics already in the stage of developing. This method has significantly advanced the development and proved to be extremely efficient.

Renato Morlotti's philosophy is simple and clear: "What kind of sail we want to build? For sure the best we can. As close to the consumer's needs as possible, easy to sail, easy to rig, stable and comfortable."



Gun Sails 2007 – What's new?

- Continuation of the 2006 appearance with use of new materials, multi directional Greytex and cross directional Whitex, two extremely durable and light x-ply versions
- Use of x-ply material in the upper panel of the flat water sails, which significantly improves the durability of that zone, stressed by sail twisting and rolling up.
- New mast sleeve material with a smooth surface structure eases insertion of the mast. The colour white is replaced by a cool grey in order to avoid a fast soiling of the sail.

Additional features such as:
- Convertible Comfort pulley, a trim block with large easy turning stainless brass rolls which greatly reduce the effort required for sail trimming, Thermofoam mast foot protector with small mesh pocket for ITB key or a safety line. The mini battens and the clew have been reengineered completely.

The new features and materials give a distinctive character to our 2007 sail line.
Gun Sails 2007 stands for more quality, longer durability and highest performance.

SAIL FEATURES

BATTEN GUARD

PVC tabs on the upper battens prevent wearing out and abrasion whilst rigging.

STRAP ON

For very easy packing away and storage: Just roll the sail up and fix the elastic retainer.

COMFORT PULLEY

The integrated Gun Sails triple pulley has large easy turning stainless brass rolls which greatly reduce the effort required for sail trimming. Also, if you prefer, the rolls are removable to allow the use of standard downhaul pulley hooks.

AIRFOIL LEECH DESIGN

The concave leech design reduces leech turbulences and avoids leech fluttering.
The sail twisting is much more harmonic and the sail control much easier in strong winds.

SLEEVE VOLUMER

The Gun Sails logo that is sewn on the sleeve keeps it open at the boom opening area like a clip and thus mast insertion is much easier.

ITB

The ITB (Internal Trim Batten) system is completely integrated into the batten pocket. The fine tuning for an optimal trim can be done with the enclosed hexagon key. The profiled end piece offers additional protection against abrasion.

TOP GUARD

The large Nylon reinforcement with attached PVC bordure at the sail top avoids abrasion. The vario top buckle is additionally covered with neoprene.

FOOT GUARD

A PVC edging from foot to the clew area protects the leech edge against your board's non-slip coating.

THERMO FOAM

The large mast foot protector protects the mast and board. With the additional strap it is very easy to pull the sail over the mast.
Small items like the ITB key or a safety line can be put in the inner, closable mesh pocket.

SBS

On all the camless sails, the batten above the boom section is positioned on the opposite side of the sail. In this way, the sail becomes equally balanced on both sides, especially in the area with the most profile.

LOW SLEEVE FRICTION

It is inevitable, while inserting the mast, the mast tip rubs against the head seam of the sleeve. Gun Sails sails are equipped with an inner close weaved, smooth strap over the whole length of the inner head seam, this protects the seam and reduces the friction forces of the mast.

BALL CAMS

On our camber sails, we use special ball or roller bearing cams for a soft rotation and easy mast insertion.
Each camber has a special shape and diameter, well-adapted for its position and guarantees an optimum fitting.

X-PLY MIX

Intelligent X-Ply Mix.
In order to guarantee longevity and stability optimums, we have focused our attention on an intelligent mixture of 5 different x-ply materials.

MULTI SEAM PROTECTION

All seams in the significantly stressed foot area are protected by Dacron coverings.
In addition to this, a wide webbing is sewn along the edges to spare the lower material and the seams.

HAMMER

FOR RADICAL CONDITIONS

As a radical wave sail, the Hammer has to work in many different conditions while giving maximum performance.
Good controllability, a well-balanced performance and immense durability are the key points of the Hammer. These characteristics make the sail ideal for all wave spots and varying waveriding styles.
With its short boom length, lower weight than its previous model and the relatively flat profile, the Hammer shows great neutrality.
When pulling the sail tight, the power can be controlled smoothly and it stays neutral, it also feels less nervous and forgives mistakes in critical situations.

Key Facts:
- 100 % x-ply construction
- Equal compatibility for standard or RDM mast
- Lower profile and a harmonic shape for a perfect on/off

P: Jérôme Houyvet · R: Camille Juban · L: Maui

PROGRAM

WAVE

RIDER'S CORNER

If I have to stand hard conditions, I need equipment on which I can 100 % rely on. The Hammer is built in 100 % x-ply and makes me feel secure, even if I exceed my own limits.

Camille Juban, Guadeloupe

TECHNICAL DETAILS

Mixture of 5 different x-ply materials

Multiple seam protection for longevity

5. THERMO FOAM — Large mast foot protector protects your board

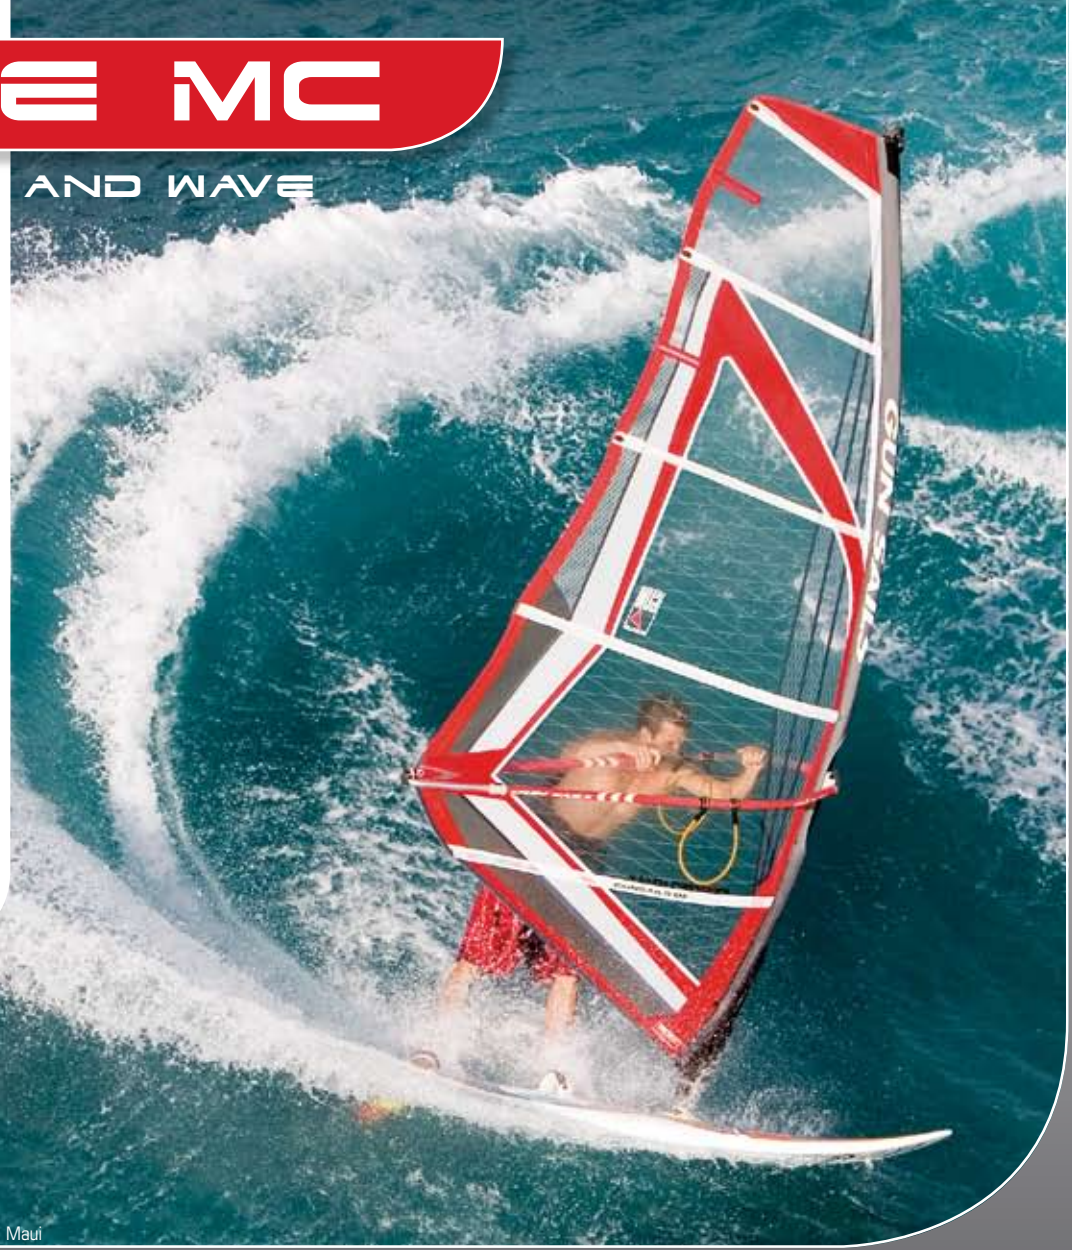
WAVE MC

POWER AND WAVE

The power wave sail in our line up gives more power than the Hammer just when you need it. It is more adaptable for difficult onshore conditions and heavier riders who demand directness. The concave leech gives a distinctive twist which allows the Wave MC to cover an immensely wide wind range without loss of control; The Wave MC has a bit more dynamism than the Hammer. The extended boom and the deeper profile produce more low-end power and more lift for all kind of jumps and manoeuvres.

With its compact shape and the steady performance it is the perfect partner for all speed manoeuvres or pure strong wind blasting.

Key Facts:
- Equal compatibility for standard or RDM mast
- 70 % x-ply construction
- Airfoil leech design for more controllability
- Deep centre of effort and deeper profile for more power in onshore conditions



P: Jérôme Houyvet · R: Martin van Geenhoven · L: Maui

PROGRAM

WAVE

RIDER'S CORNER

I need a lot of power for all my radical moves – and the Wave MC is the perfect partner for it. It offers a lot of acceleration and gives me that bit more extra power I need.

Martin van Geenhoven, Canada

CALL AND ORDER

TARGET

FREEMOVE ALLROUND

The crossover concept of the Target allows for fast planing, ambitious flat water moves or an occasional wave trip.
The main characteristics of the sail are superb early planing, outstanding speed and it is extremely easy to use.

The Target gibes very smoothly and with the slim mast sleeve, waterstarts are easy, a key point which will especially be appreciated by beginners and advanced.
The ample use of x-ply in the main panel and all other Gun Sails sail features make the Target a very forgiving sail, which will come up to the expectations of beginners as well as maneuver freaks.

Key Facts:
- Equal compatibility for standard or RDM mast
- 50 % x-ply construction
- 5/1 batten concept (5 battens, including one tube) for improved handling with more controllability for freeride use

P: Niels Patrick Geisselbrecht · R: Maria Andres · L: Soma Bay

PROGRAM

CROSS OVER

RIDER'S CORNER

For sure I prefer the Hammer in my home spot Pozo. But when I visit spots with less wind and smaller waves, the Target is my first choice, with its powerful planing and perfect rotation.

Marcos Perez, Gran Canaria

SELECTED DETAILS

1. BATTEN GUARD — Prevent from wearing out and abrasion whilst rigging
2. X-PLY MIX — Mixture of 5 different x-ply materials
3. SBS — Perfect balance of profile
4. MULTI SEAM PROTECTION — Dacron coverings of all lower seams
5. FOOT GUARD — PVC edging from the tack to beyond the clew protects the foot of the sail

CALL AND ORDER

NEXUS

ALL TERRAIN FREERIDE

The Nexus is the brand-new performance-oriented crossover sail in the Gun Sails sail family. Designed for the use in flat and choppy water conditions, it is the ideal sail for beginners and advanced as well as for maneuver-oriented freeriders.
Our designer focused on the all terrain performance, high end speed and easy handling, which are the key characteristics of the Nexus. It has that bit more power in early planing and high end speed than the Target.
The more maneuver-oriented sizes up to 5.6 have 5 battens and a slightly higher leech, the bigger sizes with 6 battens and a deeper leech have more low end power and acceleration.
The use of a RDM mast can provide better maneuverability.
Its 100 % x-ply construction provides the sail with great stability and risky manoeuvres, jumps and overthrows are more easily forgiven.

Key Facts:

- Equal compatibility for standard or RDM mast
- Moderate leech for an optimal combination of handling and speed
- 100 % x-ply construction for hardcore use
- 5/2 and 6/3 batten concept, depending on size/range of use for more handling or freeride power

P: Niels Patrick Geisselbrecht · R: Flo Jung · L: Soma Bay

PROGRAM

CROSS OVER

RIDER'S CORNER

For my freestyle moves, I really need excellent acceleration power and a maximum handling. The moves are getting more and more radical, so that my sails are always tested to the limit, in training as well as during competitions. And I can rely on the Nexus, this is for sure.

Flo Jung, Germany

5. Triple pulley with easy turning stainless brass rolls

RIDE

EASY FREERIDE

Easy handling, uncomplicated rigging and well balanced performance makes the Ride the perfect sail for windsurfing beginners and advanced surfers alike. The profile is less direct than a pure Freerider, which gives it a smooth and comfortable feeling, a very forgiving sail. Although the Ride's weight was optimised for easy handling and effortless starting when up-hauling, we have not abandoned our solid construction philosophy. The Ride is equipped with all our standard sail features to protect it. A bonus for beginners and occasionally surfers will be the attractive price and mast recommendation. The Ride works very well with the "Advantage" mast line. Of course the rig's weight and the performance can be optimised by using a higher carbon content mast.
We offer also complete rig packages for the Ride, for more information, check out www.gunsails.de

Key Facts:

- Easy trimming with comfort pulley and low sleeve friction
- 5/2 batten concept for low weight and good stability
- Vario top for flexibility of mast choice
- Multiple seam protection and foot guard avoiding abrasion while uphauling the sail

P: Niels Patrick Geisselbrecht · R: Maria Andres · L: Soma Bay

PROGRAM

FLATWATER

RIDER'S CORNER

Easy rigging, very well-balanced performance and the extremely easy handling have convinced me immediately. During the photo shooting in Egypt, the Ride became my favorite sail; it brings a lot of fun on the water.

Maria Andres, Tarifa

5. STRAP ON — Easy storage of the rolled up sail

CALL AND ORDER

FLASH

PERFORMANCE FREERIDE

As a freeride performer, the Flash is the fastest sail in the group of camless sails.
It combines early planing, high end speed and easy handling.
When pulling the sail tight, it guarantees full planing power and a stable performance in all conditions.
The Flash becomes completely neutral in the hands, doesn't react as direct as a freerace sail and feels a very forgiving sail.
With just one trim setting, the sail covers a very wide wind range and you do not need to reduce tension for lower winds.

A high-output freeride machine for sailors who want a sail that offers a maximum of fun and comfort.

Key Facts:
- Easy trimming with comfort pulley and low sleeve friction
- 5/2 or 6/3 batten concept, depending on the size, for more centre of effort stability and planing power
- Airfoil leech design for more controllability
- Multiple seam protection and foot guard avoiding abrasion while uphauling the sail

P: Niels Patrick Geisselbrecht · R: Flo Jung · L: Soma Bay

PROGRAM

FLATWATER

RIDER'S CORNER

Weekend at Tarifa, Poniente wind and it's my day off – these are the days where you can find me on the water with the Flash. Its early planing, the super easy handling and the big speed potential bring me a lot of relaxing and pure windsurf fun, simply the things I need on those days.

Renato Morlotti, Tarifa,
Gun Sails sail designer

TEMPO

POWER FREERIDE

Full profile, slim mast sleeve, 2 mini ball cams and a flatwater outline are the key points of this high performance freerider.
Committed flat water racers will be enthused by the incredible top end speed, the centre of effort stability and the upwind characteristics.
The smoothly rotating cams give the Tempo a constant profile, which easily gets you through the holes in low winds.
The airfoil leech design with its distinctive loose leech significantly extends the range of use in higher winds.

A perfect combination of superior performance, comfort and freeride fun.

Key Facts:
- 2 mini ball cams
- Deep profile for early planing
- 2 clew eyelets for flexibility of boom position in varying conditions
- High stability of centre of effort and controllability due to 6/4 batten concept

P: Niels Patrick Geisselbrecht · R: Helge Wilkens · L: Soma Bay

PROGRAM

FLATWATER

RIDER'S CORNER

Unfortunately I couldn't take part in this year's photo shooting. I would have had a lot of pleasure in showing the men the speed potential of the Tempo when it is used by a woman. The Tempo 2007 is definitely one of my favorite sails: fast, good controllability and easy handling.

Valerie Ghibaudo, France

CALL AND ORDER

BOOSTER

FREERACE PERFORMANCE

The new Booster is a top end freeracer for the committed speed freak who prefers a super fast speed machine, but one which is easy to handle. You will find in the Booster to be the strongest planing power throughout the whole sail line. This is a result of the deep profile, supported by 3 cams and a deep low leech. The 7/4, 7/5 batten concept (4 or 5 tubes) make the centre of effort stable, even in the strongest gusts. A dynamic mast sleeve design with best performance/handling ratio is guaranteed with the use of ball cams, designed in different sizes, which ensures control as well a significant easy rigging and waterstarting. Thanks to the harmonic shape of deep profile for extreme low end power and distinctive loose leech for comfort and controllability you will be able to cover an extremely wide wind range with one sail size only.

Key Facts:

- Medium width mast sleeve combined with deep profile for maximum early planing power
- Airfoil leech design with light wing top for more controllability in a wide wind range
- 2 clew eyelets for flexibility of boom position in varying conditions
- 7/4 or 7/5 batten concept, depending on the size, for freerace performance on all points of sailing

P: Niels Patrick Geisselbrecht · R: Helge Wilkens · L: Soma Bay

MEGA XS

Continuing in their established tradition, the Mega X sails are machines for committed racers who demand the highest performance and range of use.
The double-sided profiled mast sleeves vary in size and range of use: Up to 6.8 extra wide sleeve for best aerodynamic and top speed in strong winds, the XS sizes are pure strong wind speed sails for GPS racers.

MEGA XR

7.4 – 8.8: Normal wide sleeve for best compromise between weight, handling and speed, ideal for slalom and race use.
9.9 – 11.8: Medium wide sleeve for best efficiency of speed and power in the whole wind range, ideal for race and formula use.

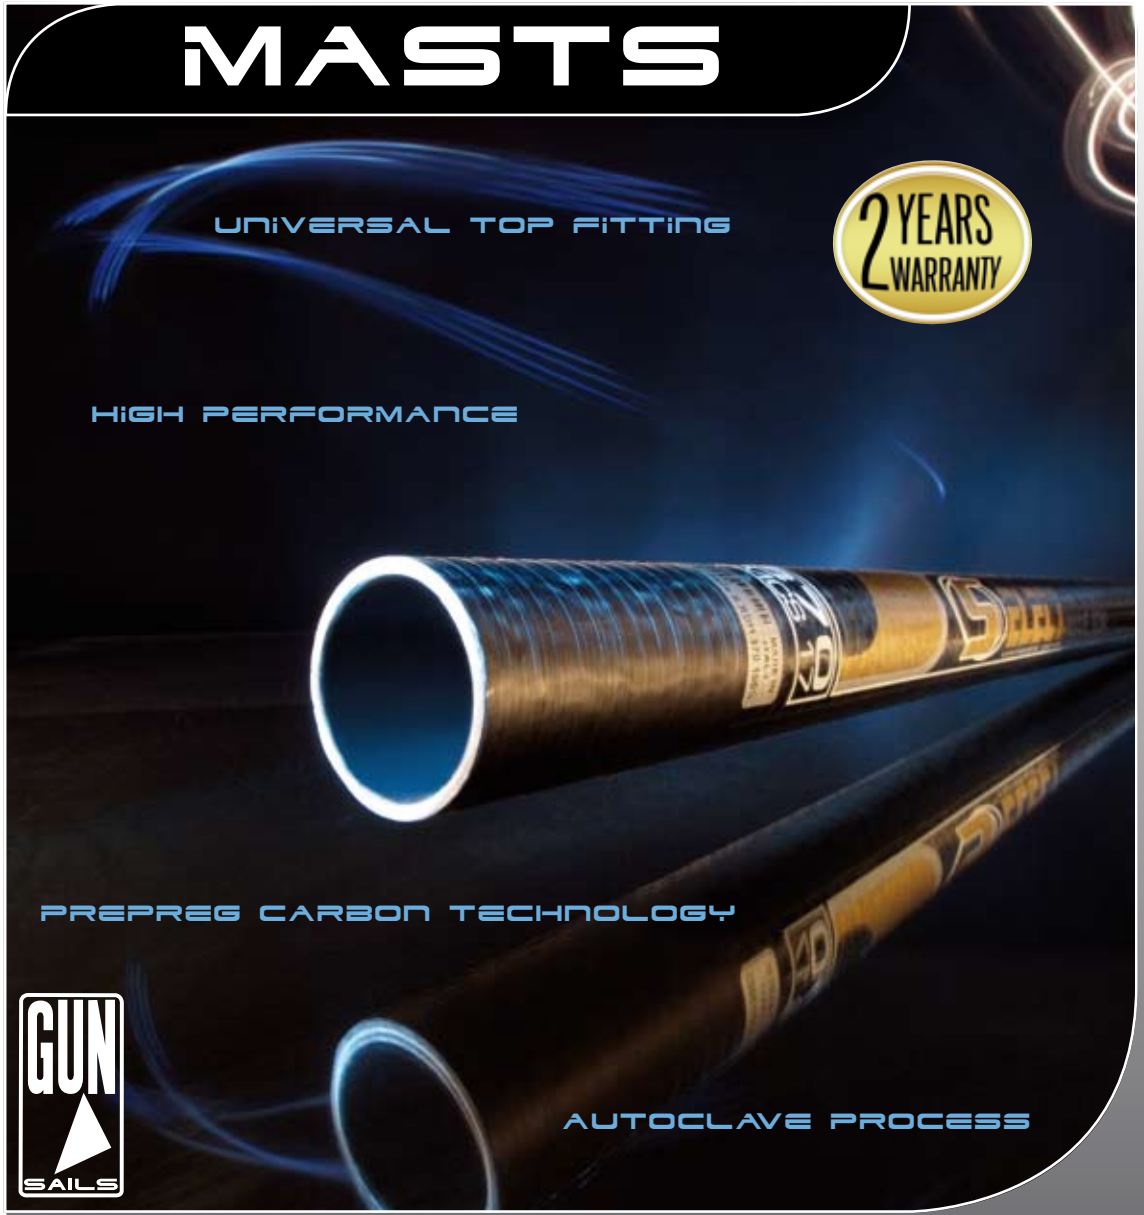
MASTS



A.C.E.S. CONCEPT

With the A.C.E.S mast line everyone can find the right mast to suit their personal performance requirements.
Our mast line up offers 4 progressive categories which adapt perfectly to your Gun Sails sail bend curve (Constant Curve) and IMCS, and they are also compatible with all current sails from other brands.
Our R&D team in Tarifa continuously tests performance and handling of our masts in varying conditions.
From the Advantage to the Select, all Gun Sails Masts are produced in high specification Prepreg Carbon Technology. Afterwards, the individual material layers are bonded in constant temperatures in autoclave procedure.
This process in combination with the high-quality materials guarantees the best results in response and durability and an optimum of weight.
Additional reinforcements in the boom area and stressed zones extend the longevity even in extreme conditions.
No matter which model you choose, you will get a Top End Gun Sails product with a 24 month warranty.

Advantage: The perfect mast for beginners and intermediates. The "Advantage" line is for those looking for a price-point and robust all-round mast with unbeatable cost effectiveness. It also has great compatibility with most of the other sail brands.

Cross: High-class versatile mast for performance-oriented sailors at an affordable price. The "Cross" line combines high dynamic output with very good handling and great robustness. It also has great compatibility with most of the other sail brands.

Expert: A high performance and lightweight mast for all demanding sailors. Very dynamic with fast reaction speeds, it will bring every sail to its maximum performance in all conditions. It also has great compatibility with most of the other sail brands.

Select: The "Select" line is our absolute ultimate performance mast for those who demand only the best in efficiency and minimum weight with no compromises.
We only use selected Prepreg carbon material where every gram of unnecessary resin is extracted from the carbon meshwork. Our Select masts will make your rig come alive. It also has great compatibility with most of the other sail brands.

550	100	35	2250

- The absolute top level mast. Super light and extremely responsive; it turns every race, freerace or freeride sail into a speed machine
- Standard diameter
- 100 % carbon percentage

BOOMS

ALU AND CARBON

Gun Sails offers an extensive and attractive boom line, designed for all ranges and uses.
Choose from our new T8 aluminium Wave, Free and Race booms, the new X-boom model in T6 aluminium or the extremely stiff and solid carbon boom.

Tube diameter of the aluminium models is 30 mm, and the carbon boom is 31.5 mm.

Double pin lock system guarantees a solid adjustment and avoids twisting of the tubes, length adjustment every 2 cm.

Trim block with quick loop to loop rope guide for the models Wave and Free; Stiff, continuous aluminium rear end.

New axial suspension front end. Easy to assemble at the mast with its new hinge lock system. Axial suspension; the front end is equipped with a rotating bearing which compensates for excessive leverage.

WAVE BOOM

The wave curve of the tubes is ideally shaped for wave, freemove and crossover sails.

Length cm	Weight kg
140–190	2,4
150–200	2,5

FREE BOOM

The Gun Sails freeride boom can be used with nearly all kind of sails, due to the co-ordinated individual tube curves.

Length cm	Weight kg
140–190	2,4
165–215	2,6
190–240	2,8

RACE BOOM

The solid double screw connection on each side of the front end guarantees the maximum stiffness and direct power transmission, without any hesitation.
The rear end of the Race boom is equipped with trimming rolls.

Length cm	Weight kg
170–220	2,6
200–250	2,9
230–280	3,1

Trim block with easy turning brass rolls.

SURF AND ORDER: WWW.GUNSAILS.DE

CARBON BOOM

The axial suspension front end has a rotating bearing which protects against excessive leverage and impacts.
The mast clamp is infinitely variable with a double hinge 360° sleeve.
The carbon tube at the front is continuous and permanently bonded to the tubes adding to the overall strength.
The adjustment system is secured with a double pin system which avoids slipping even in heaviest conditions.
The carbon tail tubes are filled with foam, the length adjustment is in 2 cm steps.

WAVE CARBON
140–200 cm, 2,4 kg

FREE CARBON
165-225 cm, 2,6 kg

X-BOOM

Light and stiff aluminium boom for crossover and freeride use.
Quick snap front end, easy to assemble, 4-fold screwed, with inner anti-slip rubber cushioning.
Very solid pin-lock fastening at the rear end, length adjustment every 2,5 cm.
Simple clew attachment via an easy loop-to-loop rope guide.

SPECIAL OFFER

XS BOOM
140–190 cm, 2,2 kg

SURFBAGS

YOUR GEAR PROTECTION

COMBIBAG = MASTBAG + SAILBAG

The Combibag provides a safe transit for sails and masts as a single unit. The mastbag can be securely fixed to the bottom of the sailbag with heavy duty clip fasteners. The mastbag can be inserted in a 30 cm long pouch at the front of the sailbag. This provides the whole unit with more security and aerodynamics during transit.
The complete combibag should be secured to your roof rack by passing the roof rack straps over the complete combibag and through the metal loops (stopping the combibag from sliding backwards or forwards) and around the roof rack.
Both bags can also be used separately.
Length: 270 cm, Width: 35 cm, Height: 32 cm

SPECIAL OFFER

USING GUIDE

For transport or storage

For air travel

UV-protection for your gear

SAILBAG

· Holds 5-6 sails with separable masts and accessories · Compression belts with quick-release fasteners · Additional tail end zip for easy unloading
